Disclosures Relating to Non-GAAP Financial Measures

Note 1. Reconciliation of Revenues to Adjusted Revenues

Adjusted revenues represents revenues adjusted to include a) amounts that would have been recognized if deferred revenue were not adjusted to fair value at the date of acquisition and b) amounts that would have been recognized if not for adjustments to deferred revenue and retained earnings related to the adoption of ASC 606. Adjusted revenues is presented because we use this measure to evaluate performance of our business against prior periods and believe it is a useful indicator of the underlying performance of our business. Adjusted revenues is not a recognized term under generally accepted accounting principles (“GAAP”). Adjusted revenues does not represent revenues, as that term is defined under GAAP, and should not be considered as an alternative to revenues as an indicator of our operating performance. Adjusted revenues as presented herein is not necessarily comparable to similarly titled measures presented by other companies. Below is a reconciliation of adjusted revenues to revenues, the GAAP measure we believe to be most directly comparable to adjusted revenues.

Note 2. Reconciliation of Operating Income to Adjusted Operating Income

Adjusted operating income represents operating income adjusted for amortization of intangible assets, stock-based compensation, purchase accounting adjustments for deferred revenue and related costs, ASC 606 adoption impact and other expenses. Adjusted operating income is presented because we use this measure to evaluate performance of our business and believe it is a useful indicator of our underlying performance. Adjusted operating income is not a recognized term under GAAP. Adjusted operating income does not represent operating income, as that term is defined under GAAP, and should not be considered as an alternative to operating income as an indicator of our operating performance. Adjusted operating income as presented herein is not necessarily comparable to similarly titled measures by other companies. The following is a reconciliation between adjusted operating income and operating income, the GAAP measure we believe to be most directly comparable to adjusted operating income.

Note 3. Reconciliation of Net Income to EBITDA, Consolidated EBITDA and Adjusted Consolidated EBITDA

EBITDA represents net income before interest expense, income taxes, depreciation and amortization. Consolidated EBITDA is calculated by subtracting from or adding to EBITDA items of income or expense described below. Adjusted Consolidated EBITDA is calculated by subtracting acquired EBITDA (as defined below) from Consolidated EBITDA. EBITDA, Consolidated EBITDA and Adjusted Consolidated EBITDA are presented because we use these measures to evaluate performance of our business and believe them to be useful indicators of an entity's debt capacity and its ability to service debt. Adjusted net income and adjusted diluted earnings per share attributable to SS&C represent net income and earnings per share attributable to SS&C before amortization of intangible assets and deferred financing costs, stock-based compensation, purchase accounting adjustments and other items.
